TESTIMONIALS
“It's rare to find a business that can actually exceed a client’s expectations. No amount of money could have purchased the compassion, dedication and attention our family was given during our crisis.”
Victoria, Phoenix AZ

“Flying Nurses International has proven beyond a doubt that they are excellent, experienced and experts in medical transports.”
Jeffery, San Diego CA

“You have been so wonderful and supportive during this ordeal, you are truly fantastic!!!!”
Judy, Anchorage AK

FLYING NURSES INTERNATIONAL
A medical travel service offering worldwide commercial air transport for individuals in need of medical assistance to travel within the U.S. or to international destinations. Our services range from medical travel consulting to providing critical care registered nurses to accompany patients on commercial aircraft. Flying Nurses International is owned and operated by experienced critical care flight nurses.

EXPERIENCE SINCE 1990
With over 20 years of flight expertise and a 100% safety record, our nurses have traveled to 6 continents, 90 countries and all 50 states in the USA. Commercial airline transport is our specialty. Whether traveling on a commercial airline or on a private aircraft, we will coordinate each travel detail to meet your medical needs. We offer a cost effective alternative to air ambulance services.

FLIGHT STAFF
Over 40 critical care and emergency medicine U.S. Registered Nurses with specialized training in aviation physiology, airline logistics and aircraft safety. Our flight nurses travel worldwide, many are bilingual, and are strategically based in several regions across the United States.

OUR SERVICES
We coordinate all air and ground travel and provide a flight nurse to accompany a patient traveling on commercial airlines or private aircraft. We arrange or consult with all phases of travel whether leaving from home, hotel, cruise ship or hospital bed. Our flight nurses will accompany you until you reach your destination.

SCOPE OF CARE
We assist patients with restricted ambulation, orthopedic injuries, behavioral health disorders, neurological injuries and complex respiratory needs. Many of our patients require full assist transfers from bed, to chair, to aircraft seat. IV fluids, medications, and oxygen therapy can be administered en route.

PREPARATION FOR FLIGHT
Our flight nurse coordinator will consult with your health care provider to obtain travel clearance and medical orders required for your transport. We customize your travel by coordinating ground and air transportation, arrange for oxygen, wheelchair, ambulation assist devices and specialized medical equipment. We coordinate each travel detail to ensure that all of your needs are met from bedside to bedside.

SAFE TRAVEL IS OUR PRIORITY
During travel planning, we closely monitor your medical condition by frequent consultation with your health care team. You work with one flight nurse coordinator, who is available to you 24/7, from your first phone call until you arrive at your destination. Medical treatment is administered under the direction of your personal physician’s medical orders. Your in-flight emergency treatment is performed in accordance with the American Heart Association Basic Life Support Standards.

MEDICAL ESCORT SERVICE
This is our most utilized service. Your flight nurse will accompany you from bed to bed and be seated next to you in the first class cabin of a major commercial airline. We assist patients who are immobile or unable to care for their needs by physically transferring them to a first class reclining seat. stretcher services are available with select carriers. IV fluids along with oxygen therapy are an accepted practice in an airline cabin. Upon arrival at your destination, your flight nurse will provide a detailed briefing to the receiving medical facility. If home is your destination, your flight nurse will assist you and your family in making a comfortable adjustment to your environment.

TRAVEL CONSULTING
We offer consultation for family assisted flights not requiring the assistance of a nurse. We will coordinate all or selected portions of ground and air transportation arrangements. Confirmation of medical clearance by your primary care physician is required. We offer customized and detailed options at an affordable rate.
